

MAKE A WEBSITE TODAY WITH AI

From a mood board to a live website in one day. No coding experience needed.
Your workbook for today's course with Ian Ramírez Rivera, Invest Puerto Rico.

Scan for the slides
and Copy buttons

HOW TO USE THIS WORKBOOK

- ☒ Tick the big box when you finish a step.
-  Write in the spaces: they feed your Step 5 prompt.
-  Copy the boxed prompts from the slides (scan the QR), or type them exactly as printed.

My site idea: what is it, and who is it for?

☐ First, make a folder called **My Website**. Everything you collect goes there.

COLLECT

Steps 1–4 Images, animations, colors and your section order. Three sites to browse, one list to write, one folder to fill.

☐ 01 FIND INSPIRATION IMAGES

Save 2 or 3 screenshots of looks you love.

- Search like this: “food cart website”, “tropical landing page”. Save them in **My Website**.
- Look at layout, mood and type: where the headline sits, how many sections.
- Screenshot with **Shift Cmd 4** (Mac) or **Win Shift S** (Windows).

 pinterest.com

SAVED ☐ 1 ☐ 2 ☐ 3

☐ 03 PICK A COLOR PALETTE

Pick one 4-color palette. Copy its four codes.

- Browse **Popular**, or search a mood: pastel, warm, dark, retro.
- Click a color to copy its code, like **#009A9D**.
- Easy mix: one dark, one light, two accents.

 colorhunt.co

Swatches: color them in, or leave them blank.

#	#	#	#
Dark	Light	Accent	Accent

MOOD

☐ 02 FIND INSPIRATION ANIMATIONS

Pick one or two animations and their sections.

- Browse by type: hero, buttons, cards, text effects.
- One wow moment for the Hero is plenty. Two great effects beat ten busy ones.
- Write the section here. Paste the link into your **My Website** note: it goes into the page 2 template.

 originkit.dev

SECTION

 EFFECT

SECTION

 EFFECT

☐ 04 PLAN YOUR SECTIONS

Your sections in order, one short idea each.

- **Navbar** first, then **Hero**. End with a **Footer**.
- 3 or more in between: About, Services, Contact.

1	Navbar
2	Hero
3	
4	
5	
6	
7	Footer

PROMPT

Steps 5–6 Turn everything you collected into one clear design spec.

05 MASH IT INTO ONE DESIGN SPEC

Fill in the five blanks from page 1, then type the prompt into a note saved in **My Website**.

- ▶ You are the art director: the AI is fast, but it needs your taste from page 1.
- ▶ Replace every **{CURLY BRACKET}** completely. No brackets should be left in your prompt.

THE TEMPLATE, WORD FOR WORD (COPY BUTTON ON THE SLIDES)

Build a single-page, static website for... **{EXPLAIN WEBSITE USE IN YOUR OWN WORDS}**
The section and layout are... **{INSERT MOCKUP SECTION ORDER AND IDEAS}**
Use these colors and mood... **{PASTE YOUR 4 COLOR CODES AND A MOOD}**
Extract and implement this element in the **{DESIRED}** section **{PASTE LINK FROM OriginKit}**

YOUR VERSION

Build a single-page, static website for... *Who is it for, and what should a visitor do? One or two sentences.*

The section and layout are... *Your Step 4 list. No room? Write "Step 4 list", but type the real list.*

Use these colors and mood... *The four codes from Step 3, plus a word or two for the feel.*

_____ # _____ # _____ # _____ Mood _____

Extract and implement this element in the *From Step 2. Two animations? Type this line twice.*
*Write the effect name here; paste its link from your **My Website** note when you type.*

_____ section OriginKit effect _____

_____ section OriginKit effect _____

EXAMPLE • PIRAGUAS DE MARISOL Use these colors and mood... #0B3C5D ocean, #FFF6E5 coconut, #FFB400 parcha, #FF5C8A frambuesa. Tropical, fresh and playful.

06 LET BOLT.NEW ENHANCE YOUR PROMPT

Paste your prompt, click + then **"Enhance prompt"**. Save the result: that is your master prompt.

- ▶ Create a free account first. Look for the + next to the prompt box.
- ▶ One click turned the example's 11 words into 62, with spacing, fonts and phone layout.
- ▶ Copy the enhanced prompt into **My Website** before you send. You paste it again in Step 7.
- ▶ After you send, Bolt builds a design of its own. Keep it: that is **draft 1** of five.

DONE ☐ account created ☐ master prompt saved ☐ draft 1 kept

 **bolt.new**

BUILD

Steps 7–10 Five drafts, one favorite, polished with Claude on your own computer.

07

MAKE FOUR MORE DRAFTS

Paste your master prompt into arena.ai (drafts 2 and 3), then into Google Stitch (drafts 4 and 5).

- arena.ai

 - In the mode menu, choose “Side by side”.
 - Model A: `gemini-3.8-flash-high`
Model B: `Claude-sonnet-5-high`
 - Paste, send, and watch both previews build.
- stitch.withgoogle.com

 - Sign in with Google, paste the same prompt: draft 4.
 - When draft 4 is ready, send the dark prompt below in the same chat: that is draft 5.
 - Ask for changes if you like; export any version.

TYPE OR PASTE INTO STITCH FOR THE DARK VERSION (COPY BUTTON ON THE SLIDES)

Make a second version of this design with a dark theme. Keep the same sections, layout and content, and adjust the colors so the text stays easy to read.

08

PICK. DOWNLOAD.

Tick each draft as it appears, fill in the circle next to your favorite, then download its code into My Website.

- Compare them in a phone-sized window, too. Pick the best starting point, not a perfect one.
- Look for **Download**, **Export** or **Code**. Got a zip? Double-click it to unzip in **My Website**.

MADE	#	TOOL	WHAT I LIKE ABOUT IT	FAVORITE
☐	1	Bolt.new Step 6		☐
☐	2	arena.ai · Model A gemini-3.8-flash-high		☐
☐	3	arena.ai · Model B Claude-sonnet-5-high		☐
☐	4	Google Stitch light		☐
☐	5	Google Stitch dark		☐

09

OPEN IT IN CLAUDE

Open the Claude desktop app, click the Code tab and choose My Website.

- No desktop app? Use [claude.ai](#) in a browser.
- Claude edits the site; you approve each change.
- Stuck? Ask Claude: “Help me open this folder.”

FIRST CHANGE I WILL ASK FOR

10

TYPE OR PASTE THE STARTER PROMPT

Copy it from the slides (scan the QR on page 1) or type it word for word. Press Enter.

- “First time” makes Claude explain simply. “Open it for me locally” gives you a live preview.
- “Section by section” keeps it calm. “Anchor links” makes the menu scroll to the right place.

WHAT CLAUDE SAID FIRST

STEP 10 · COPY FROM THE SLIDES, OR TYPE EXACTLY

This is my first time creating a website. Help me polish and finish the website design. I downloaded this from an online tool and would like to work on it locally until we have a final version. Familiarize yourself with the file, open it for me locally so I can see the changes, and let's work section by section from top to bottom, including the elements and anchor links. This is a single page website, static. Guide me through all this process.

11 GO LIVE

Ask Claude to publish your site for free on GitHub Pages. Then, if you like, give it your own domain. Copy the prompts below from the slides (QR on page 1), or type them exactly.

A • PUBLISH ON GITHUB PAGES

- ▶ No GitHub account yet? Claude walks you through creating a free one.
- ▶ Claude creates the repository, uploads your files, turns on Pages and gives you a link like **yourname.github.io**.
- ▶ The first publish is not always instant: refresh the link. Guide: docs.github.com › Pages.

🌐 github.com

🌐 pages.github.com

PASTE INTO CLAUDE

Publish the website in this folder to GitHub Pages. If I don't have a GitHub account yet, walk me through creating one first. Then create a public repository, upload the files, turn on GitHub Pages and give me the live link.

B • YOUR OWN DOMAIN

- ▶ Search your dream name at Cloudflare or GoDaddy.
- ▶ .com is not always the cheapest: a fun ending like **.site**, **.xyz**, **.party** or **.science** can cost less.
- ▶ Check the first-year price *and* the renewal price. When Claude has connected it, turn on **Enforce HTTPS** in GitHub Pages settings.

🌐 cloudflare.com/products/registrar

🌐 godaddy.com/domains

PASTE • USE YOUR DOMAIN

Connect my domain yourname.site to my GitHub Pages website. Do it for me if you can, or walk me through each step.

Swap yourname.site for the domain you bought.

DONE ☐ published ☐ domain bought ☐ domain connected ☐ HTTPS on

DOMAIN IDEAS

NAME	ENDING	1ST YEAR	RENEWAL
		\$	\$
		\$	\$
		\$	\$

MY LIVE LINK

https://

Share your live link with the team. We'll collect everyone's sites into one gallery.

🔒 **Keep it public-safe.** No home address, personal phone, email or other personal data.

SHARE IT: TEACH SOMEONE

- ▶ Pick one person with a project: a side business, a hobby, a cause, a portfolio.
- ▶ They choose the images, colors and animations. You guide the eleven steps with this workbook.
- ▶ Read Claude's answers together: "Does this look like what we wanted?" One day is enough.

WHO I WILL TEACH, AND THEIR SITE IDEA

NOTES

Stuck on any step? Ask Claude: "Explain this step to me like it's my first time."
Live! I'm telling every ghost I know.
