BUILD A WEBSITE TONIGHT WITH AI

FROM A MOOD BOARD TO A LIVE WEBSITE IN ONE EVENING. NO CODING EXPERIENCE NEEDED.

A REAL WEBSITE WITH YOUR NAME ON IT

Pick a project you care about. By the end of tonight, it has a home on the internet.

- One page, clean and animated, that looks designed
- Built by you, guided by AI, no code written from scratch
- Hosted for free on GitHub Pages

YOUR MOVE Write down one website idea right now. A hobby, a family business, a school project. Keep it small.

FIND INSPIRATION IMAGES

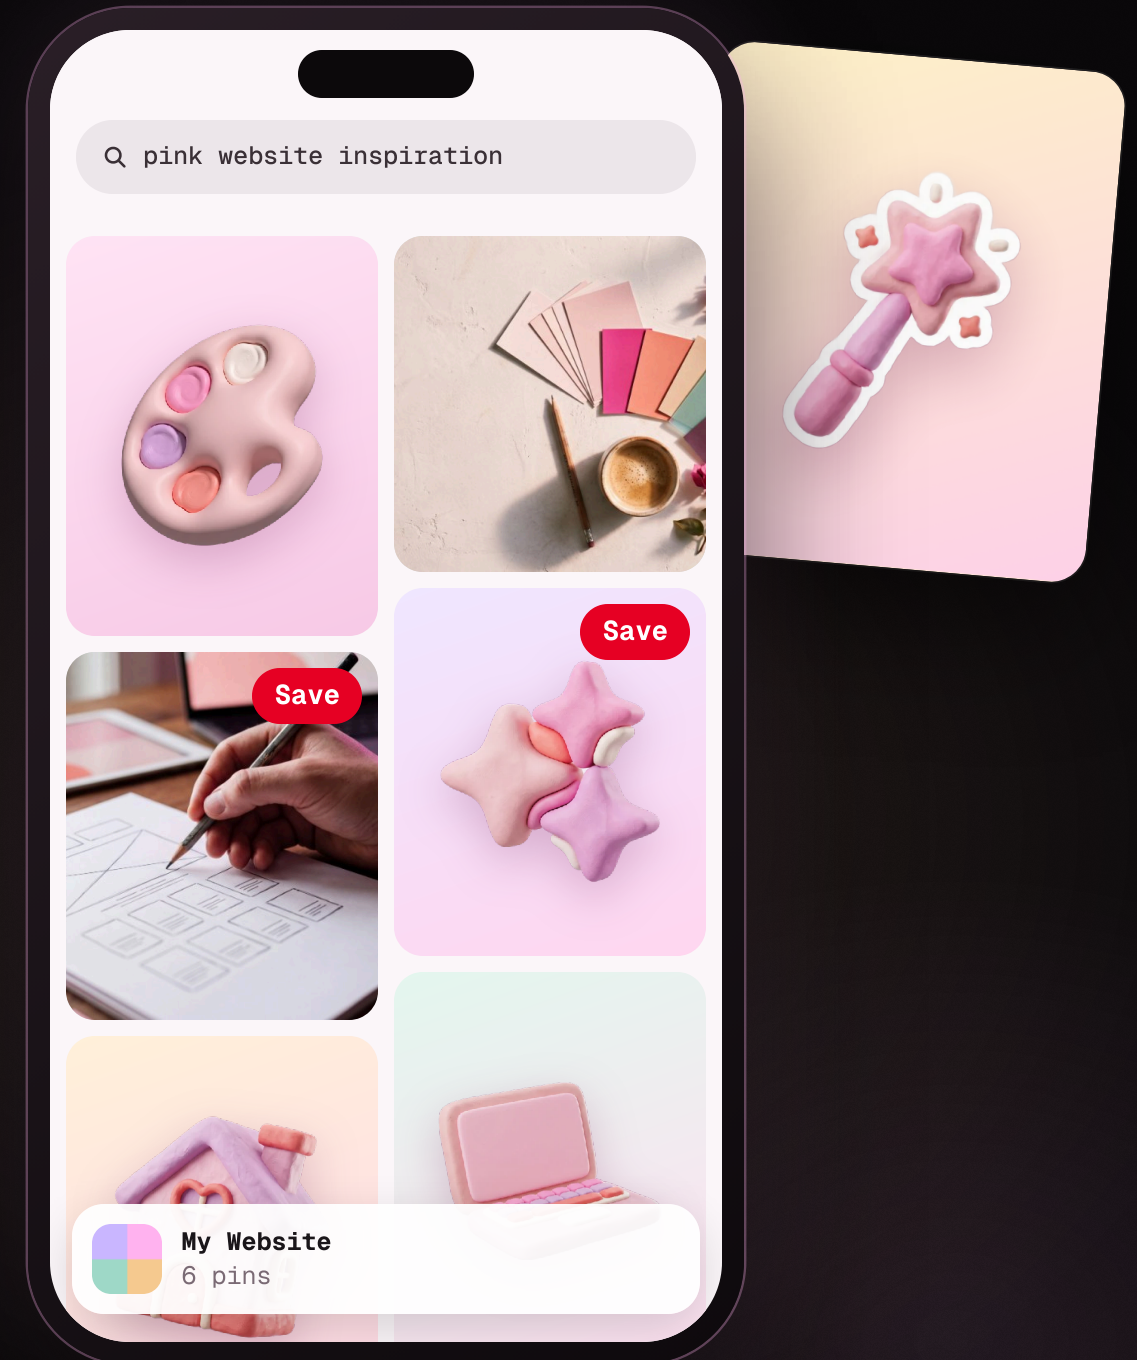

Search for the kind of site you want.
Save the looks you love to one board.

- Search terms that work: "bakery website design", "landing page UI", "portfolio web design"
- Look for layout, mood, and typography, not just pretty photos

pinterest.com ↗

5-10 pins is the sweet spot

YOUR MOVE Make a Pinterest board named after your project and save your first 3 pins.

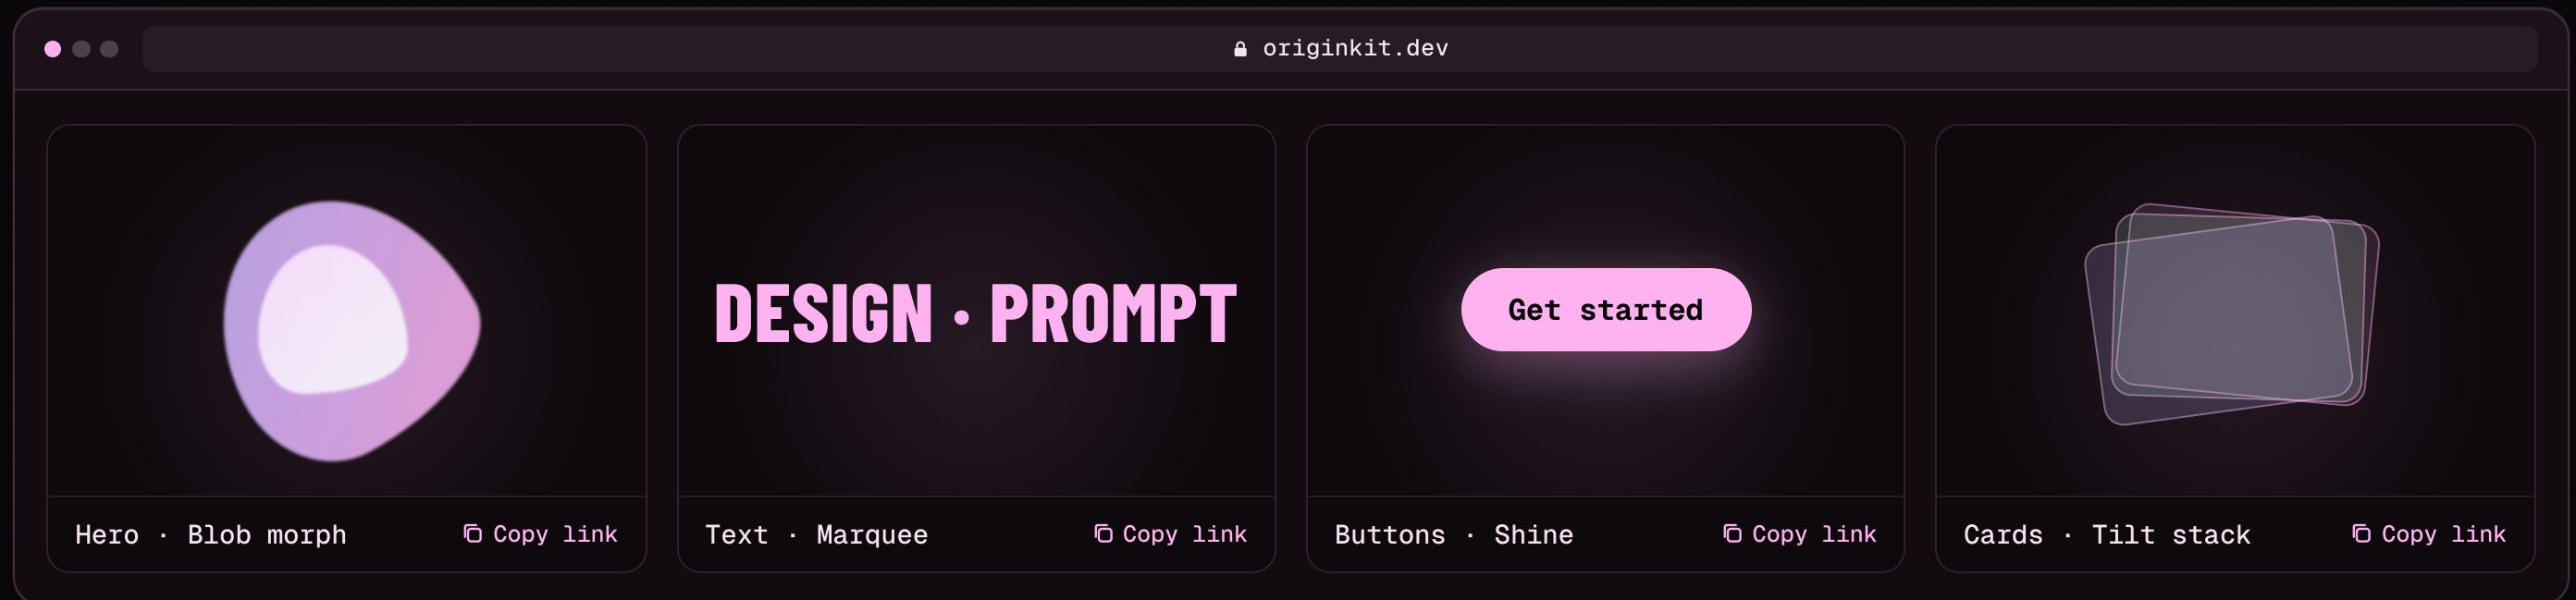

FIND INSPIRATION ANIMATIONS

A free library of animated website pieces.
Find one or two you love and copy their links.

1-2 animations per
site is plenty

originkit.dev ↗

YOUR MOVE Save one OriginKit link and write next to it which section it goes in, like 'Hero'.

HERO:
ORIGINKIT.DEV/...

PICK A COLOR PALETTE

Ready-made palettes of four colors that already look good together. Pick one, copy the codes.

— Click a color to copy its code, like #FFB2EF

— Tip: one dark, one light, two accents is an easy mix

#1D2A4D

DARK

#FFF0FA

LIGHT

#FFB2EF

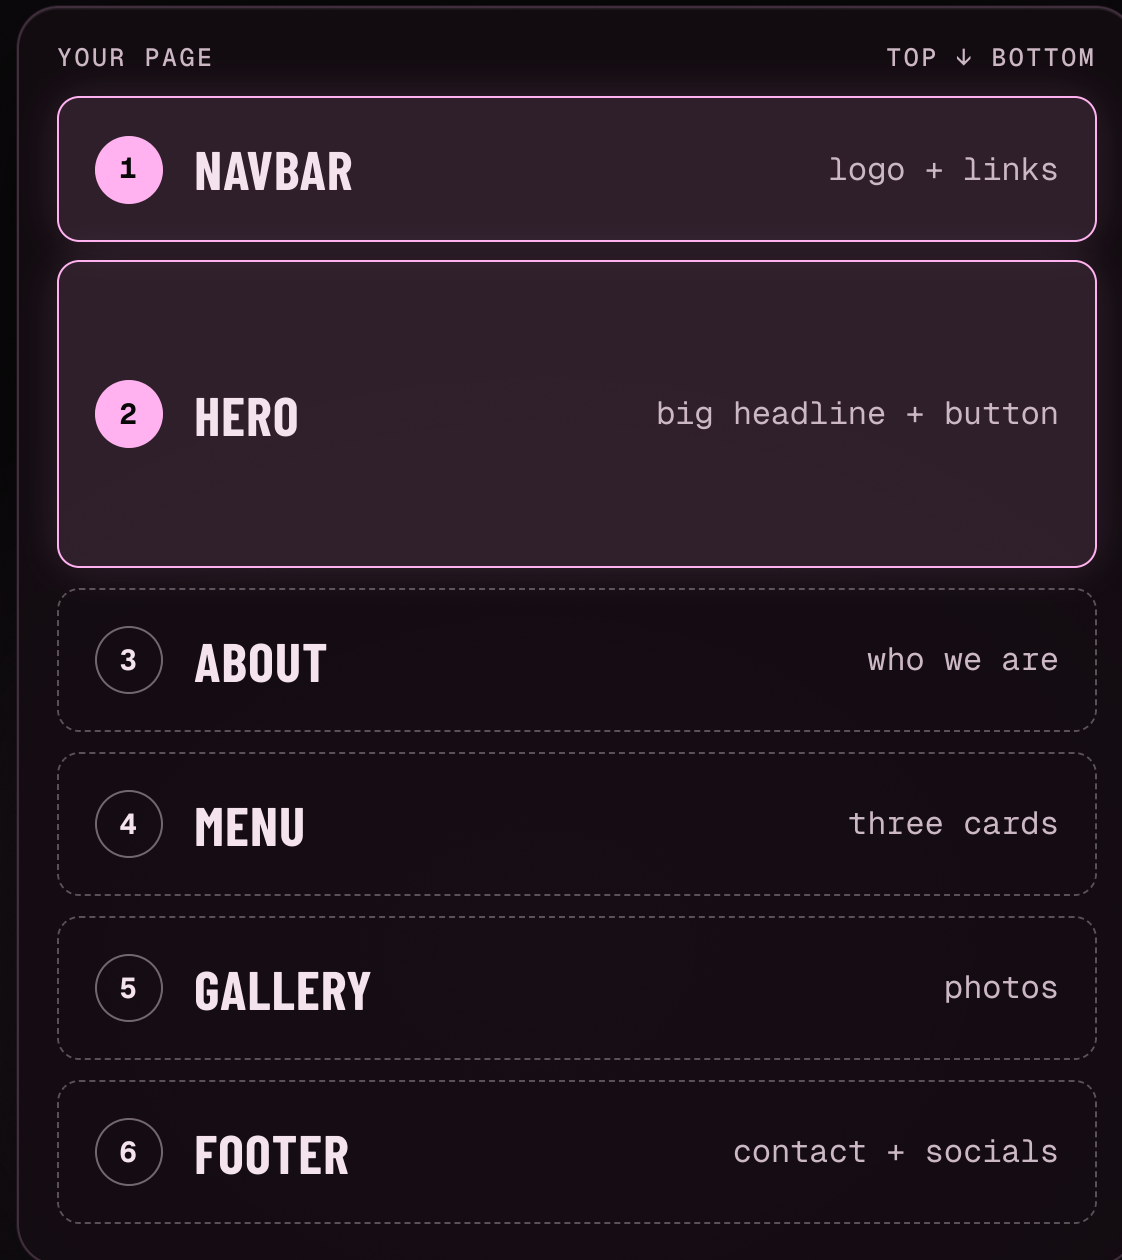

ACCENT

#F7C59F

ACCENT

YOUR MOVE Copy one palette's four color codes into your notes.

PLAN YOUR SECTIONS, TOP TO BOTTOM

List your sections in order. Navbar first, then the Hero. After that, it is up to you.

- Then add 3 or more: About, Services, Menu, Gallery, Reviews, Contact
- Add one short idea per section, like 'three cards with photos'

YOUR MOVE Write your section list: Navbar, Hero, and at least three more, each with a one-line idea.

STEPS 5-6

PROMPT

MASH IT INTO ONE DESIGN SPEC

Take what you love from every piece and describe it in one prompt.

YOUR MOVE

Open the template on the next slide and fill in the first blank: what is your website for?

FILL IN THE BLANKS

Copy it. Swap each pink blank for your own words and links.

● ● ● Design spec prompt

📄 COPY THE TEMPLATE

Build a single-page, static website for... ① {WHAT IS YOUR SITE FOR?}

The sections and layout are... ② {YOUR SECTION LIST}

Use these colors... ③ {YOUR 4 COLOR CODES} and this mood... ④ {3 MOOD WORDS}

Extract and implement this element in the ⑤ {SECTION NAME} section ⑥ {ORIGINKIT LINK}

① your idea ② Step 4 list ③ Step 3 colors ④ Step 1 board ⑤ a section name ⑥ Step 2 link

YOUR MOVE Copy the template, replace every blank, and save it in your notes.

LET BOLT.NEW ENHANCE YOUR PROMPT

One button turns your filled
template into a master prompt.

SO MUCH BETTER!

BEFORE • YOUR STEP 5 TEMPLATE

Build a single-page, static website
for... my family's bakery. Sections:
Navbar, Hero...

★ Enhance prompt

AFTER • YOUR MASTER PROMPT

→ save it in your notes

Build: a single-page, static website for a
family bakery.

Sections: Navbar • Hero • Menu • About us •
Gallery • Contact.

It tells Claude you are new, what the file is, and how to guide you.

// This is my first time ❶ creating a website. Help me polish and finish the website design. I downloaded this from an online tool and would like to work on it locally until we have a final version. Familiarize yourself with the file, open it for me locally ❷ so I can see the changes, and let's work section by section from top to bottom ❸, including the elements and anchor links ❹. This is a single page website, static. Guide me through all this process.

❶ Claude explains things simply

❷ you get a live preview

❸ calm and organized

❹ menu links scroll to the right place

YOUR MOVE Copy this prompt, paste it into Claude, and press Enter.
